

# 3380 clamping printed material

Project nr: 3380  
Client: Graphics industry  
Project supervisor: Marc Oliver, AOG, Spain  
Project engineer: Mikael Kayser TAWI

A pneumatic clamping tool for TH80 is used to clamp the printed material tightly so that it can be easily bundled.  
Stroke is 200 mm.

The clamping action of this TH80 application is solved with a pneumatic unit.
